

Activity 03 · Projected income statement and cash flow

Finance for Non-Finance Managers | C525 | Day 1 · 70 minutes

Scenario

Meridian Components Pte Ltd needs a simple FY2026 forecast. Use the assumptions as editable inputs; all values are fictional SGD thousands.

Files supplied

Open **mock-data.xlsx**. Source tabs contain fictional data; use the **Your Analysis** tab or add calculation tabs. Work in pairs, then explain your decision to the class.

Instructions

1. Build a projected FY2026 income statement from the base year and Assumptions sheet. Separate cash operating expenses from depreciation.
2. Calculate projected profit before tax, tax and profit after tax. Use cell references to the assumption inputs.
3. Build an indirect operating cash-flow forecast and then closing cash after capital expenditure and debt repayment.
4. Run a downside scenario with 2% revenue growth and 65% COGS as a share of revenue. State the effect on profit and closing cash.

Submission and checks

Submit a workbook with base and downside forecasts plus a short explanation. All assumptions should remain visible and editable.

All company names, figures and benchmarks in this activity are synthetic teaching data. This is classroom practice, not a graded assessment or investment advice.
