

Activity 04 · Trend analysis and industry benchmarking

Finance for Non-Finance Managers | C525 | Day 2 · 65 minutes

Scenario

Compare two fictional business-services companies with a fictional sector benchmark. Revenue and balance-sheet amounts are SGD thousands.

Files supplied

Open **mock-data.xlsx**. Source tabs contain fictional data; use the **Your Analysis** tab or add calculation tabs. Work in pairs, then explain your decision to the class.

Instructions

1. Compute each company's FY2023–FY2025 revenue trend and FY2025 revenue growth.
2. Calculate FY2025 gross margin, operating margin, current ratio and debt-to-equity from the company data.
3. Compare each FY2025 ratio against the fictional sector median. Explain at least one limitation of comparing firms using a single median.
4. Choose which company needs a deeper review and support the recommendation with three figures.

Submission and checks

Submit a comparison table and a concise management note. Distinguish your calculation from the benchmark supplied.

All company names, figures and benchmarks in this activity are synthetic teaching data. This is classroom practice, not a graded assessment or investment advice.
